Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6,11,12,16-21,26,27 and 31-37 are rejected under 35 U.S.C. 102(e) as being anticipated by del Castillo et al. (6539207).

Regarding Claims 1-6,11,12,16-21,26,27 and 31-37, del Castillo et al. show a removable antenna assembly comprising a plurality of diversity, patch antennas 70 and 100 for TX and RX wireless signals over a plurality of wireless channels (e.g., WLAN, IEEE 802.11), a sectorized mounting structure 40,42 is provided for retaining the antenna elements in an antenna isolation configuration, and at least one removable network interface 10 for selectively enabling a signal connection between a radio digital interface component and the antennas, and the PCMCIA card is connected to a host computer containing a motherboard, all arranged as claimed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2828

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7-10,14,15,22-25,29 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over del Castillo et al. (6539207) in view of Freeburg et al. (5355520).

Regarding Claims 7-10,14,15, 22-25,29 and 30, del Castillo et al. show the structure of the antenna communication system as set forth above. Freeburg et al. are cited as evidence of obviousness and as resolving the level of ordinary skill in the antenna art and shows in Figures 1,4 and 5, antennas mounted upon facets around a circular support, sectorized with at least a hexagonal arrangement. It would have been obvious to employ any number of antenna elements on such a support in lieu of the dual antenna arrangement in del Castillo et al for providing omnidirectional, long or short range as desired.

Allowable Subject Matter

5. Claims 13,28 and 38-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wimer whose telephone number is (571) 272-1833. The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minsun O. Harvey can be reached on (571) 272-1835. The fax phone
